SUMMARY

I build AI systems that work in the real world, not just impressive prototypes. My path into tech was not obvious, but once I discovered it, I found a field where curiosity, creativity, and problem-solving come together. Today, I turn ambitious AI ideas into reliable tools that people can actually use. I am still learning, still building, and determined to create a career that reflects both my ambition and who I am.

WORK EXPERIENCE

FULL-STACK & AI DEVELOPER – SMARTELIA

Python – React JS – Angular – Next JS – Node JS – Google Sheets – GitHub

December **2025**
Present

- Built an internal AI-powered SaaS platform that automates marketplace product-catalogue creation for Amazon and other channels. Designed modular AI agents for parsing, scraping, attribute mapping, SEO, and content generation, supported by a human in the loop verification layer. Reduced catalogue-matrix production time by 75% (4× faster).
- Built an AI-powered Amazon SEO generator using Google Gemini to produce optimised titles, bullet points, and descriptions, boosting Content team efficiency and output quality at scale.
- Executed targeted web scraping and data extraction initiatives to fuel data-driven decisions across cross-functional teams.

DATA AND AI ENGINEER INTERN – VIRTUOCODE

Python – TypeScript – Monday.com – Slack – LangChain and LangGraph

August **2025**
December **2025**

- Built an AI coding agent that converts Monday.com tasks into review-ready GitHub pull requests. Orchestrated Claude and OpenAI models through a LangGraph workflow covering code analysis, implementation, automated QA, browser testing, and human approval.

PROJECT COORDINATOR, COMMUNICATION EVENTS – PEACE IN GARDEN

- Defined and implemented communication strategy guidelines, driving cohesive team alignment and leading end-to-end event planning and execution.
- Automated budget tracking and financial reporting using Google Sheets and integrated tools, streamlining workflows and reducing manual overhead.

January **2024**
August **2025**

EDUCATION

FIRST YEAR OF A MASTER'S DEGREE IN COMPUTER SCIENCE

IT University Madagascar (December 2025 - Present)

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

IT University Madagascar (September 2022 - December 2025)

HIGH SCHOOL DIPLOMA — MAJOR IN MATHEMATICS AND PHYSICS

Ecole Sacré Coeur Antanimena (September 2016 - July 2022)

PERSONAL PROJECTS

SHOPPING CENTRE APPLICATION

Node.js - Express - Angular - MongoDB

- Multi-role shopping-centre platform inspired by Akoor, providing centralised management for the centre and its businesses, along with a complete customer interface.
