SUMMARY

I am a Computer Science student with a genuine passion for Artificial Intelligence; though I don't rely on it for everything I do. My goal is to earn a degree specializing in that field. I didn't always love tech, but the moment I stepped into it, everything changed. I thrive in a world that moves fast and never stands still. As a Big Data and Artificial Intelligence student, I am driven by ambition: build a strong career, earn well, and one day retire far from any screen.

WORK EXPERIENCE

AI DEVELOPER – SMARTELIA

Python – React JS – Angular – Next JS – Node JS – Google Sheet

August 2025
Now

- Built an AI-powered Amazon SEO generator using Google Gemini to produce optimized titles, bullet points, and descriptions — boosting Content team efficiency and output quality at scale.
- Engineered a multilingual SEO pipeline that auto-translates and adapts Amazon product content across 7 European marketplaces, enforcing compliance standards and cutting production time significantly.
- Developed an AI-driven Amazon A+ content review tool with Gemini and LangChain, automating multi-client proofreading workflows and drastically reducing manual review time.
- Executed targeted web scraping and data extraction initiatives to fuel data-driven decisions across cross-functional teams.

INTERN DATA ET AI ENGINEER – VIRTUOCODE

Python – Monday.com – Slack – langChain and langGraph

August 2025
December 2025

- Built a fully autonomous AI coding agent that converts Monday.com tasks directly into production-ready GitHub Pull Requests, leveraging Claude and OpenAI LLMs within a LangGraph pipeline across a rigorous multi-step workflow: code analysis, implementation, automated QA, browser testing, and human validation.

PROJECT COORDINATOR, COMMUNICATION EVENTS – PEACE IN GARDEN

- Defined and implemented communication strategy guidelines, driving cohesive team alignment and leading end-to-end event planning and execution.
- Automated budget tracking and financial reporting using Google Sheets and integrated tools, streamlining workflows and reducing manual overhead.
